

Bringing big ideas to life

Changing people's relationship with their liver

The number of people who die from liver disease is still increasing. That's why we are partnering with shopping malls, retail chains and sports stadiums, to drive home liver health messages through a large scale educational program.

Creating a bioartificial liver

On May 2 the Foundation in collaboration with Institut Pasteur will host a first meeting bringing together world-leading experts in regenerative medicine to make this revolutionary idea a clinical reality.

Shedding new light on occupational liver disease

By leveraging skills and capabilities in the EASL scientific community, we are raising awareness of the importance of applying an evidence-based approach in the assessment of hepatic risks associated with occupational and environmental exposures.

This is what success looks like

Everyday you are a positive part in the life of people with liver disorders. Because when we find new cures, eliminate disease, restore health and extend life, we bring joy and hope for a better future, not only to patients, but also to everyone around them. That's why the International Liver Foundation is dedicated to providing the funds and support you need.

Supporting innovation and funding progress

EASL
INTERNATIONAL
LIVER
FOUNDATION

Introducing the EASL International Liver Foundation.

The EASL International Liver Foundation has been created to support innovative research, nurture the new generation of liver scientists and mobilize the necessary knowledge and best practices in liver health. We are building partnerships and driving collaboration with patients, civil society, governments and the private sector. The Foundation will deliver dedicated fund-raising and strategic support for scientists, clinicians and educators around the world, so they can turn ideas into reality.

The more we raise the more we can fund

The most important work of the International Liver Foundation is to raise money. Because the more we raise the more we can fund research & development, clinical programs and education. That's why we have made donating so simple on our website. With a few clicks anyone can start to make a difference. So please encourage everyone you know to go and give what they can at easl-ilf.org/donate/

Prof. Massimo Colombo
Head, Center of Translational Liver Research.
IRCCS Humanitas Rozzano Milan,
Chairman of the Board

Prof. Christian Bréchet
President, Institut Pasteur, France

Prof. Jeffrey Lazarus
Affiliated Professor CHIP, Rigshospitalet,
University of Copenhagen

Prof. Laurent Castera
Department of Hepatology, Hôpital Beaujon,
AP-HP INSERM U773, University of Paris-VII,
Secretary General of EASL

Prof. Tom Hemming Karlsen
Full Professor of Internal Medicine, Senior
Consultant of Gastroenterology and Hepatology
Department of Transplantation Medicine Oslo
University Hospital Rikshospitalet and University
of Oslo, Vice-Secretary General of EASL

Prof. Jordi Bruix
Head of the BCLC (Hepatic Oncology). Liver
Unit. Hospital Clínic. University of Barcelona.
IDIBAPS. CIBEREHD.

Our board - leaders in the field

Prof. Hans Heinrich Wedemeyer
Dept. of Gastroenterology, Hepatology and
Endocrinology, Hannover Medical School

Prof. Mark Thursz
Professor of Hepatology at Imperial College
and Consultant in Hepatology at St Mary's
Hospital, London

Dr Stefan Wiktor
Professor of Medicine & Public Health,
University of Washington, Seattle, USA

Benoît Merkt, Dr. iur
Partner, Lenz & Staehelin
